Vegetable Seed Trials

An Important Time to Buy

We want to sell you seed at the lowest possible prices. Financial conditions at this time are such that we believe it will be to the buyers' advantage to book or buy their seeds early. Seeds almost without exception advance just before planting time comes. We have hundreds of customers who come in early and book their wants, at a definite price, and no matter if prices go higher, they pay no more than the booked price. If prices go lower, they are given the benefit of the lower price. This protects the buyer in every way, and as a rule saves him some money on his seed purchases.

The Grades We Offer

All seeds are graded to the very best advantage. Our Eclipse grade is the best grade that can be produced, and graded to conform to the United States Number One standard. The Fancy or Second Grade is in many ways the equal of the best grade, only some little thing that is not up to the required standard. The third grade is Choice. This grade is high in purity, but lower in germination. Then comes the Prime Grade, still high in quality but still lower in germination. Of course the prices conform to the grades. You will find our prices usually lower than asked by most reliable seed houses. Try us, we will do you good.

Eclipse Brand Seeds

Throughout the South and Southwest sections of the country, ECLIPSE BRAND SEEDS are known for the high quality in purity, vitality, and germination. The few customers we served thirty years ago, have grown to an army of thousands and many of them send us orders year after year.

Our experience of years in producing the highest quality seeds has been rewarded by the financial success of our customers. Upon your request we will at any time send you samples of any field seeds you want to plant, and these samples will at all times represent the identical seeds we will ship you. Trusting that we may have the privilege of serving you, and wishing you a happy and prosperous year, we are

Very truly yours,
CLARKE & KELLER SEED STORE.

Please Note

We want you to read the preceding paragraphs in order to familiarize yourself with our aims and endeavors in presenting you the following varieties of field, garden and flower seeds. We wish we could see you face to face to give you this message, but since we can't, won't you read each word of it carefully, believing it as an expression of our true feelings and wishes?

Our Terms are Cash F. O. B. Shawnee

Soliciting your orders with our promise that we will give you honest goods at honest prices,

IMPORTANT

Cheap seeds are dear at any price and are a losing investment.

Clarke & Keller's Eclipse Brand

Tested and cleaned seeds are equal in every way to the best that can be produced; no better can be bought at any price.

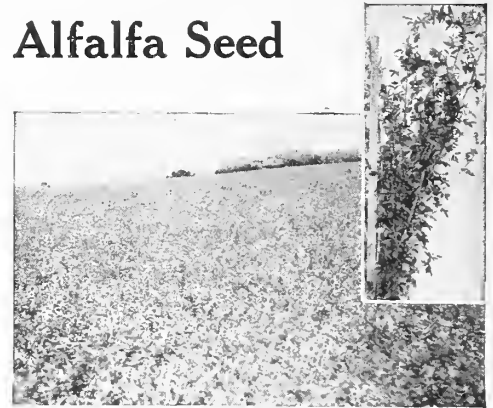

Warning

When you are offered seeds from out of the state seedsmen at a lower price than the seed is offered you at home, be sure and ask for a sample before buying, and you will find that the seed is, in a large majority of cases, of an inferior grade; and in a great many cases will contain noxious weed seed that will ruin your fields for years to come.

Seed Laws

Seeds purchased from us will be labeled to comply with the laws of your state. We are familiar with your state's requirements and will comply with the demands of the state in which you reside.

Alfalfa Seed

We were the first in the Alfalfa producing sections of the state this year, and had the choice of the crops of seed. We bought carefully of seed offered, and our selection was only the seed of the highest purity and vitality that was threshed. After recleaning this seed with our electric machines, we find that we can offer the planters a quality of seed that will be equal to and superior to most of the seed sold in the South and Southwest. Our seed will test 99½ per cent or better purity, with absolutely no noxious or other weed seeds. This is our Eclipse Brand, which we sell in car lots to many of the critical seedsmen of the eastern states. Many seedsmen look to us for their supplies, knowing the superior quality we place on the market. We can furnish Alfalfa seed in all grades, and each grade will be priced at an attractive price. Prices are very much lower than the past season. All seed will be tagged to comply with your state seed law, with which we are familiar. Thousands of bushels are in our warehouses awaiting your orders, and requests for samples and prices. No farm that has even a small acreage that will grow Alfalfa should be without it. Ask for samples and prices.

"GROHOMA, the wonder grain, will produce under extremes of drouth"

Seed Oats

Kanota or Fulghum Oats

These hardy type oats have shown their ability to out-yield most any variety of oats grown in the southwest.

They will mature a week to ten days earlier than the Texas Red Oats and on this account alone, the crop sometimes will be made and out of the way of hot weather. On account of the smut damage that is prevalent in oats in this country we urge that you treat all seed stocks with "Ceresan" at least ten days before sowing. Fancy, re-cleaned and sacked ready for shipment we are making a special price of 60c per bushel, f. o. b. Shawnee, Okla.

Texas Red Rustproof Oats

This time tried variety of rustproof oats will always give high yields under the average soil and weather conditions. Our stocks are secured from only the best of the crops, so you are assured of securing good quality and pure seed stocks from us. Treat your seed stocks with "CERESAN" and increase your yields by preventing smut. Special price of 60c per bushel, f. o. b. Shawnee, Okla.

DWARF ESSEX RAPE SEED

Holland grown Rape produces fine pasture for hogs, sheep and poultry. It can be planted early and will last until late frost. One pound 30c, postpaid. Ask for prices in large quantities.

Sweet Clover

Mellilotus Alba White Blossom

This can be called the upland Alfalfa, as the pasture and hay is in every way its equal. Will grow on the very poorest soil. Is a superior soil builder, adapted to any soil, makes a fine ensilage, and is one of the most popular plants for bees. Sweet Clover honey is the best honey produced, and brings the highest price. Sow 12 to 15 pounds per acre in fall or early spring.

Price, 25c per pound, 2 pounds 45c, postpaid. Ask for prices in large quantity.

Lespedeza, or Japan Clover

We carry both the Common and the Korean varieties. It is a wonderful prolific grower, liked by all stock, and adapted to any soil. We cannot recall ever selling a customer who was dissatisfied. Sow it in rough places and it will thrive and keep down weeds. On medium and heavy soil it will produce a wonderful amount of pasture. Sow in corn or row crops or small grain and it will come on after the harvesting of the crops.

One lb. for 35c postpaid; 2 lbs. for 65c postpaid. Ask for special prices on large amounts.

Clover Seed

While there is not much call for many of the clover varieties, we carry in stock White Dutch Clover, which is used mostly for lawns; Red Clover, for the field crop; Burr Clover for pasture, and Alyske Clover, a fine pasture and hay clover. Write for prices and samples if in need of any of these.

Grass Seeds

We carry in stock the grass seeds that are more commonly used in the South. All new crop re-cleaned seed. English Blue Grass, Kentucky Blue Grass, Rye Grass, Red Top, Timothy, Orchard Grass, Bermuda Grass. The prices are lower than we have ever known them to be.

Prices: English Blue and Kentucky Blue, 40c per lb.; 5 lbs. \$1.50. Italian Rye Grass, Red Top, 35c lb.; 5 lbs. \$1.35. Timothy, lb. 25c; 5 lbs. \$1.00. Bermuda Grass, 45c per lb.; 5 lbs. \$1.75; all postpaid.

Orchard Grass

Orchard Grass

In the orchards, pecan groves, and anywhere that is partly shaded this grass is proving a decided success in this section. We believe that it is the most productive grass for grazing that has been tried here, and where it had been growing for a year or more it went through the long drouth of 1931 in good shape. It stands the lowest temperature, starts early in the spring, and remains green until late frost. You would be pleased with this grass if you tried it. Sow early on prepared ground 14 pounds per acre.

Prices: lb. 25c; 2 lbs. 45c; 5 lbs. 85c, postpaid. Ask for prices in larger quantities.

Lawn Grass

We have made a study of Lawn Grasses and the seed adapted to the Southland. If you will advise us the character of the soil you wish to make into a lawn, whether shady or in the open, sandy or heavy soil, we can tell you what is best to plant. Our lawn mixture is made from the highest grade seeds, and are free from weed seed. Sow 1 pound on 100 square feet ground.

Price: Lb. 45c; 2 lbs. 75c; 5 lbs. \$1.50, postpaid.

Sudan Grass

The production of Sudan seed is the largest in history, and it will be much lower in price than it sold for this past year. There is no more dependable grass grown for both pasture and hay. Will grow on the poorest soil, and produce an abundance of feed under the most unfavorable climatic conditions. Its feeding value is acknowledged, and the tonnage secured makes it a valuable crop. Sow 30 to 40 pounds to the acre on heavy soils, and 20 to 25 pounds on light soils. Always glad to mail you samples of seed free from Johnson Grass or weed seeds of any kind. No grass stands like sudan. We have counted more than two hundred stalks from a single seed. It is fine and juicy when broadcast, but can be planted in rows and cultivated if desired, making a better yield but the hay is not as fine, and will not be eaten as well by stock. We have bought our stock at very low prices, and are prepared to sell it at a very low price. Ask for special prices on large amounts.

Sugar and Stock Beets

High in sugar content makes Beets a fine winter green feed for the poultry, cows and hogs. They make a rich feed, relished by stock and poultry and easy to keep. Plant for best results in 18 inch rows and thin to ten inches in the row. Store in basement or hill out in the open. About one-fourth the daily ration can be fed. The following sorts have proven best.

	Oz.	¼ Lb.	1 Lb.
Golden Tankard	\$0.10	\$0.20	\$0.60
Giant Feeding10	.20	.60
Mammoth Long Red10	.20	.60
White Sugar10	.20	.60
Lane's Sugar10	.20	.60

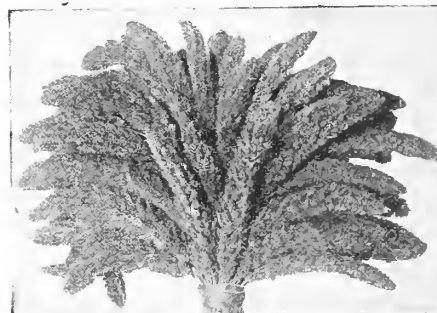

Cow Peas

Cow Peas will be lower in price than for many years past. A wonderful crop to produce and one of the highest protein feeds grown. They are a great soil builder, being a legume, gathering from the air a nitrogen so essential to the fertility of the soil. You can get the benefit of fertilization without turning the vines under, thereby getting the value of the hay and pea crop, and also building the land. Plant 10 to 12 pounds in rows, or ½ to 1 bushel broadcast. We will have in stock Whipperwills, Red Rippers, New Eras, Clays, Yellow Crowders, White Crowders, Black Eye Peas and Lady Peas. Price: 1 lb. 25c; 2 lbs. 45c, postpaid. Ask for prices on larger quantity.

Spring Barley

If every upland farmer in the South grew an acreage of Spring Barley there would be many trainloads of feed that is shipped in from the North for feeding, that would have to look for a market in other sections of the country. Planted in February and March it makes a quick growth and is matured before the summer heat can injure it. It is almost certain that you will harvest a crop if you prepare a seed bed and sow the seed. Divide your corn acreage on upland with Barley. Ask for samples and prices.

Big German Millet

The large poultry growers grow it for laying hens, feeding it in the straw, in the scratch pen. For hay sow 25 lbs. to the acre; for seed 15 lbs. per acre.

Ask us for samples and prices.

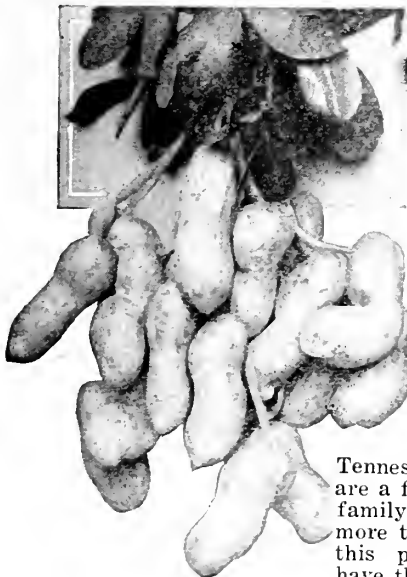

We doubt if you were ever offered as fine a grade of pure German Millet as we offer you at this time. It is so good that we have bought a great deal more seed for our 1932 trade than we have ever bought before. Our entire stock of several hundred thousand pounds is grown from pure Tennessee cultivated seed, and is 100 per cent pure and as bright as can be grown. Millet will mature a crop of hay in 60 days and is an excellent feed for both the dairyman and the poultry people. It is much lower in price than the past season. Dairymen are growing more and more millet every year, as it is a milk producing hay, and mixes well with the clover feeds. Ask for the lowest prices quoted in years.

White Wonder Millet

A heavy producer of hay and a good seed crop can be grown from this variety. Some prefer it to the Big German Millet. It does well in the arid sections. We have large stocks of selected seed grown especially for seed purposes. Postpaid, lb. 25c; 5 lbs. 50c. Prices in large quantities with samples on application.

Peanuts

We find from observing the crops grown in this section in 1931, that peanuts have stood the long extended drouth better than any other crop that produces under

the ground. They grow best in light sandy soils, though they grow on any well cultivated soil. They are one of the highest protein and fat producing crops grown, and the hay is a very superior feed, especially for the dairy herd. The Spanish is the most popular variety for feed, though many prefer it for human consumption. The

Tennessee Red Peanuts are a fine peanut for the family and are planted more than any other for this purpose. We also have the Virginia Jumbo which grows the largest.

All are new crop seed, cleaned and ready for the planter. We offer the Improved Spanish at 25c per lb., 2 lbs. 45c, 5 lbs. 65c, postpaid. The Tennessee Red, lb. 30c; 2 lbs. 50c; 5 lbs. \$1.00, postpaid. The Virginia Jumbo, lb. 30c; 2 lbs. 55c; 5 lbs. 90c, postpaid. In small lots postage consideration adds to the delivered price on seed. On the larger quantities the seed in most instances will cost less per pound.

Sunflower Seed

MAMMOTH RUSSIAN grown for shade and feed. Will produce 30 to 40 bushels to the acre. Is an excellent feed for poultry. Can be planted as late as July 15th and mature a crop.

Price: Pkt. 10c; lb. 35c; 2 lbs. 50c, postpaid.

Japanese Buckwheat

A quick growing crop that is grown mostly for bees. It is a splendid poultry feed and with a good growing season will mature a crop in 55 days. Can be planted up to August 1st.

Price: Lb. 30c; 2 lbs. 55c; 5 lbs. \$1.25, postpaid.

Other Field Seed Items

We sell pure strains of Wheat, Rye, Spring and Winter Barley, Hard and Soft smooth head Wheat, Spring and Winter Rye, Spring and Winter Bearded Barley and Winter Turf Oats. All carefully selected and re-cleaned at market prices.

"GROHOMA stalks are sweet, fodder is heavy, grain yields very large."

Field of Hegari

Non *Saccharine Sorghums

We are fortunate in being in touch with the best growers of the country, where we secure our supplies of grain sorghums. For the spring of 1932 we will have the highest grade seeds that we have ever offered to the trade. By the most critical selection of the seed for growing the crops, and frequent inspection, careful harvesting, cleaning, and grading, we offer as high purity seed as it is possible to obtain, at the lowest possible prices.

Dwarf White Black Hull Kaffir, Hegari, Darso and Feterita are among these seed, and we are confident that you will profit by using the seed offered.

In a small way we offer the above seed at lb. 20c; 2 lbs. 35c, and 5 lbs. \$1.00, postpaid. By freight or express, 25 lbs. at 6c, 50 lbs. at 5c, and 100 lbs. \$1.00, charges collect.

"New Wonder Kaffircorn"

A new type of Dwarf White Kaffircorn has been developed, which during the past two years has shown its ability to mature

two to three weeks ahead of the common Dwarf White Black Hull Kaffircorn. By observing it for two seasons, we are convinced of its value to every farmer, so are offering it this year to our customers. In many field

comparisons this year the New Wonder Kaffircorn matured a good crop while the old type made nothing.

Price: Lb. 20c; 2 lbs. 35c; 5 lbs. \$1.00, postpaid. Special prices on large amounts.

Fertilizer for the Field Crops

We are agents and carry in stock Swift's Red Steer Brand of fertilizers for corn and cotton, potatoes and root crops, as well as for the gardens and lawns. We also carry Potash, Nitrate of Soda, Lime and Bone Meal. Our customers using fertilizers are getting double the amount of production where they fertilize. You can do as well.

Darso Field

Double Dwarf Milo Maize

This straight necked Milo maize is proving very popular where grain alone is wanted. The stalks are very low, head is erect, making it easy to harvest with a header outfit. Heads are quite large, producing heavy grain yields and making good crops during years of drouth. Lb. 20c; 2 lbs. 35c; 5 lbs. \$1.00, postpaid. Special prices on large amounts.

Dwarf Milo Maize

If you want only the grain crop, Milo maize produces under the most trying conditions. It is a deep rooting hardy grain and grown in the arid sections more than any other grain crop. The forage is not a good feed. Stock will eat the leaves but not the stalks. Three to four weeks earlier than kaffircorn.

Price: Lb. 25c; 2 lbs. 45c; 5 lbs. 90c, postpaid.

Darso

The Darso seed which we are offering comes from one of the most careful growers in the state, his fields are hand rogued and the seed stocks used have been developed by years of careful selection. Darso is one of the sweet grain sorghums, the stalks of which are rich in sugar content, thereby making an excellent feed. The stalks are also short jointed with heavy fodder which with the very heavy grain yields, makes it one of the best all around forage and grain crops to grow for feeding stock. Being a great drouth resister we have known it to make excellent crops when all surrounding cane crops burned up entirely. Lb. 20c; 2 lbs. 35c; 5 lbs. \$1.00, postpaid. Special prices on large amounts.

Sagrain

Another very popular member of the sweet grain sorghum family which makes excellent heads and fine fodder is the Sagrain. Makes excellent growth either in rows or broadcast and grows well over most of the South and Southwest. It will grow to a good height under trying moisture conditions. If you want a sure feed crop, plant Sagrain. Lb. 20c; 2 lbs. 35c; 5 lbs. \$1.00, postpaid. Special prices on large amounts.

"Try GROHOMA this year, you will plant more next year."

Grohoma Seed

The most profitable fat and protein grain produced. A new grain but a superior one. A cross between Seeded Ribbon and Kaffir. The equal of the cane as a feed crop and produces more than twice as much grain of a higher feed value than the kaffir. Three weeks earlier than kaffir, and the past year after the long severe drouth was green from top to the ground while the kaffir was dead. It has produced as much as fifteen tons of fodder and 100 bushels of grain per acre. Stock consumes the fodder completely. Grohoma stools more than any of the kaffir strain, making from 3 to 10 stalks to the seed, every stalk producing a head. It is easy to see how the crop on fair land with an average year can produce the heavy yield claimed for it. Hundreds of farmers who have planted it this year have harvested the only grain they saved. The extended drouth had taken all other grain crops. We cannot recommend it too highly. It has really been a lifesaver for many of the farmers living on the thin land. It roots deep in the ground, taking its nourishment below the range of other grains, and does not deteriorate the top soil for other crops. Test made by the chief chemist of the Oklahoma Board of Agriculture gave it an analysis of 12.33 protein, fat 3.80, N. F. E. 70.24, fiber 2.50. Test made on June 11, 1930.

Our seed from selected heads, thoroughly matured and cleaned and tested is the best seed produced. Two pounds will plant an acre in three foot rows, though some claim that a pound is sufficient. We quote this seed at 1 lb. 25c; 2 lbs. 45c; 5 lbs. \$1.00. Parcel post prepaid up to 5th zone. Ask for special prices on large amounts.

The general agent of the Union Pacific Railway says that in his opinion, Grohoma is the most wonderful and profitable crop grown in semiarid districts.

A grower near Haywood, Oklahoma, says, "Grohoma stayed green all over and kept growing into a bumper crop, while the Kaffir and Darso burned up."

A Colorado grower says, "Sweet and juicy, much relished by cattle and horses; hail, wind and drouth had no effect on production."

After inspecting a number of fields of growing Grohoma in 1930, the President of the State Board of Agriculture of Oklahoma said, "I want to give my hearty cooperation and support to the growing of this product in Oklahoma."

It is being grown successfully in all the states of the South, as well as many of the North. It will grow for you.

Cane Seed for Forage

Sorghum Cane seed is used more for the hay crop in the South and Southwest, than any other seed. Our seed is grown for us by contract, by experienced growers in the best growing sections of Kansas, Oklahoma and West Texas. From long contact with growers, we contract only with those who use the proper methods to produce the highest type of the different varieties. You can depend on getting seed of the best quality if you buy from us. After going through our modern cleaning machinery you will find the seed as near 100 per cent as can be produced. The varieties are Improved Black Amber, Early Orange, Kansas Orange, Sugar Orange, Red Top, Sourless or African Millet. Our sorghum varieties are Japanese, Honey Drip, Texas Seeded Ribbon and Waconia Orange. Price on forage cane seed: Lb. 20c; 2 lbs. 35c; 10 lbs. 75c, postpaid. Sorghum cane seed at 30c/lb.; 2 lbs. 50c; 10 lbs. 75c, postpaid. Ask for samples and prices on larger lots.

Seeded Ribbon Cane Field

Japanese Seeded or Honey Drip Cane

Sorghum making on the farm has been the most profitable money crop that we know of. Thousands of gallons have been made and have been sold for good prices. Our seed comes from a local grower, Mr. W. L. Gentry, who is an expert in the growing and making of sorghum. His output has been over 100 gallons per acre, and one large store bought the entire output, as they recognize the superior quality of this variety, and pay a better price than for any other variety.

His cane was thoroughly matured when headed, and the seed is the best we have ever handled. It is thoroughly rogued and inspected. It comes close to 100 per cent purity, and will test 95 per cent or better germination. We most sincerely recommend this seed to our trade.

Price: Lb. 30c; 2 lbs. 55c; 5 lbs. \$1.10, postpaid. Ask for samples and price on large lots.

Waconia Orange

Price: Lb. 25c; 2 lbs. 45c; 5 lbs. 90c, postpaid.

Away up north in Minnesota where the seasons are short, and the crops have to grow fast in order to mature, the great Waconia Syrup Factory has produced a syrup cane seed that is early and a superior variety. It is three weeks earlier than any other sorghum cane. It produces a heavy percentage of juice, and where used the past season has been highly satisfactory. Five pounds will plant one acre.

Broom Corn

We offer Standard Evergreen, Oklahoma Dwarf, Japanese Standard. Broom corn will grow on the thin lands, and is an easy crop to grow. The stock has no feed value. Plant in 3 foot to 3½ foot rows, and space the stalks 10 to 12 inches in the row. Five pounds will plant an acre.

Price: Lb. 30c; 2 lbs. 50c; 5 lbs. 90c, postpaid.

"GROHOMA has proven its worth over the entire South and Southwest."

Certified Seed Corn

The South is becoming more careful in the growing of corn. By the use of better bred and more carefully selected seed this store has kept pace with the demand for certified seed, the use of which the maximum production is achieved. The highest grade of selected seed, bought from one of the largest seed corn concerns in the U. S. is bought each year; this we furnish the best growers of this section to grow the corn that we offer you. Hand picked, rubbed and tipped, graded and cleaned; you will find our seed corn uniform in size, insuring a good stand of corn that will be far superior to the commercial grades offered by many dealers.

Careful elimination of all inferior ears, our force of efficient workmen select only the best of the field and then re-sort before our critical selection is made. Owners of the finest fireproof warehouse and the best and latest equipment that money will buy, we are prepared to furnish our customers a seed corn that will satisfy. If you buy seed corn from us and it is not satisfactory, return it and we will return your money and pay all carriage charges. Treat your seed corn with Semesan Jr. to insure stands and freedom from diseases.

Oklahoma Grown Seed Corn

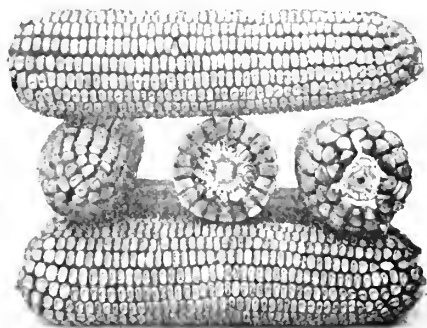

The Yellow Dent certified by the grower.

Corn, probably second to cotton in importance, should have every consideration from the planter. As we have been doing for some years in the past, we secured the Mason City, Illinois, seed corn for our grower again this year, and being one of Oklahoma's most successful corn growers, he has grown for us one of the largest and best crops that we have ever had. All this corn was matured before most corn was badly injured by the drought. Applying our efforts to the growing of a corn that will be safe by July 1st, and supplying such a large number of customers with these varieties, has enabled the growers to always mature a crop on account of its early maturity.

Early Yellow Dent

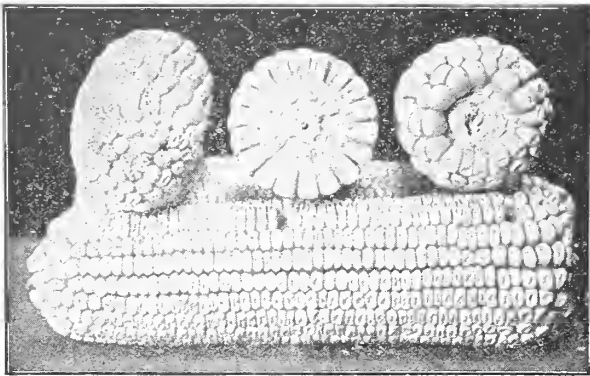

Certified by
grower

Matures in
90 days. Has
bright golden
color. Ears
good size. Is
heavy and
filled to the
ends. Will be
made before
July 1st if

Early Yellow Dent

planted by April 1st. Made 55 bushels per acre this year on medium soil. The best and surest yellow corn grown on the upland of the south. For the lighter soils this is the safest corn you can plant early—of the standard varieties. It has small cob. One pound 25c; two pounds, 40c, postpaid. Not prepaid—one peck, 75c; one bushel, \$2.50.

Iowa Silvermine

This is one of the old standbys, being a 90 day corn, nearly certain to make and very popular with those wanting a white corn. Is a heavy yielder on the heavy soils and will make on the average upland soils if any climated strain grown in Oklahoma. One pound 25c; 2 lbs. 40c, postpaid. Peck, 75c; bushel, \$2.50, f. o. b. Shawnee, Okla.

Surecropper

This corn is an early maturing, drought resisting variety that is growing in popularity every year. It can be planted in summer on stubble ground and will produce a much larger tonnage than June Corn. Ears are large, corn white and run 14 or more rows to the ear. 1 lb. 25c; 2 lbs. 40c, postpaid. Not prepaid: 75c per peck; \$2.25 per bushel.

Improved Squaw Corn

This is a fine drought-resisting corn, producing ears 10 to 12 inches long. Its color is blue, red and white. Fine for roasting ears or for hogging down. Grows 5 to 6 feet, has 1 to 3 ears to the stalk, and matures in 75 days. Lb. 30c; 2 lbs. 45c; postpaid. Not prepaid: \$1.05 peck; \$3.00 bushel.

Hickory King

White corn with smallest cob. Kernel will cover the end of cob. Largely planted for roasting ears, hominy and meal use. Lb., 30c; 2 lbs. 45c; postpaid. Not prepaid: \$1.25 pk.; \$4.00 per bu.

Cotton Seed

We have been selling cotton seed for planting for 30 years. We have handled a great many varieties, but we have never had as many favorable reports from any variety as we have had from Oklahoma "44" Strain No. 11. In tests made by the A. & M. College in 1929, of 39 varieties this variety produced more than any of the 39 except one. In selecting a variety to standardize on, the farmers in this country decided on this cotton, and they are to grow a 4,000 acre average for the purpose of eventually growing a higher grade of lint for this country. The lint in the above test was one inch length, and the percentage of lint 34.7. The test made covered a six year period, and the money value per acre for this period was \$66.45 or \$12.30 more per acre than the next highest, out of six of the popular kinds of cotton planted in Oklahoma.

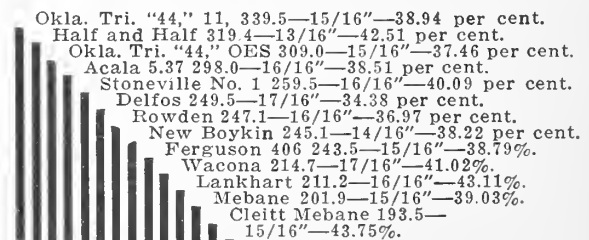

We have nice stocks of this seed, grown by a member of the Oklahoma Crop Improvement Association and a master farmer in every respect. We quote this seed at \$1.25 per bushel, 3 bushel bags \$3.50, f. o. b. Shawnee, Oklahoma.

We also have in stock Mebane, Acala No. 5, and Half-and-Half of high grade seed, which we will be glad to quote on application.

Are You Growing the Most Profitable Cotton?

OKLAHOMA TRIUMPH "44," STRAIN 11, WILL MAKE YOU MORE DOLLARS PER ACRE FROM YOUR TIME, LABOR AND LAND DEVOTED TO RAISING COTTON.

Lower Your Production Costs Increase Your Cotton Yields with **CERESAN**

The New Seed Cotton Disinfectant

Ask for
Free Booklet

By treating your seed cotton before planting, with CERESAN, the new dust disinfectant, you can frequently save from one-quarter to one-half the seed you formerly planted, avoid the cost and labor of replanting—and increase your crop yield.

CERESAN-treated seed germinates more uniformly—assuring even stands of vigorous, healthy plants.

CERESAN protects the seed from rotting in the cold, wet soil, permitting earlier planting and thus enabling the plants to set bolls before the boll-weevil starts its disastrous attacks.

CERESAN also reduces the number of plants killed by damping-off. It is effective in the control of seed-borne anthracnose and reduces the damage to the plant caused by seed-borne angular leaf spot.

	PRICES
By effecting a saving in the cost of seed sown, controlling seed-borne damping-off, root and boll rots, permitting earlier planting to protect against boll weevil attacks and increasing the yield of better grade crops, CERESAN repays its small cost many times over.	1 lb...\$.75 5 lb... 3.00 25 lb... 12.50 100 lb... 49.00 300 lb...144.00

One pound treats over five bushels of seed.

Saves Seed • Improves Stands • Controls Disease

Special Testing Equipment

When you buy Eclipse Brand seeds, you get the highest grade of seed that can be produced. Thoroughly re-cleaned and graded, of the highest purity and germination, packed in heavy secure packages for shipment, we conscientiously feel that we have served you as we would have you serve us. Your satisfaction is worth more to us than the small profit that we make from our sales. With this attitude, honestly expressed, we feel that we are as well equipped to serve you as any seed firm in the country. Every farm can make a greater profit by using the best seed.

For testing seeds for purity and germination. We have the necessary equipment and a man who has had 20 years experience in testing seeds for purity and germination. Having taken the government course in this work, and being so well informed as to identity of all foreign seeds, he has become a highly specialized man for this work. This places us in a position to buy seeds by sample that are free from noxious as well as other weed seed and our customers run no more risk in befouling their fields with seeds that are unfit to plant. We are glad to submit samples of seed at any time on request.

"If you want lots of grain and fodder, plant GROHOMA."

Inoculators, Etc. *Crow-Tox*

What "Crow-Tox" Does

Protects your corn during the period when it is most easily damaged, by ridding your fields of crows, pheasants, blackbirds, and other corn-pulling birds and animals, such as squirrels, woodchucks, moles, gophers, etc. "Crow-Tox" aids and hastens germination, makes healthier stalks, larger yield per acre, saves loss of seed and labor of re-planting. "Crow-Tox" is non-poisonous and will not injure any kind of corn. Neither will it clog any planter or kill birds or animals. But "Crow-Tox" will keep them away and prevent destruction of your crops by them.

To Use "Crow-Tox"

Put clean corn in metal container which liquid will not penetrate. Then pour "Crow-Tox" Repellent over the corn and mix thoroughly. After thoroughly mixing, put treated corn in planter. Do not use foreign substances for drying purposes, such as lime or plaster, as it is not necessary.

"Crow-Tox" Is Fully Guaranteed

"Crow-Tox" is a fully guaranteed product and should it fail to entirely satisfy the user, we will refund the purchase price without question.

LARGE SIZE CAN	\$1.50
Treats 2 bushels of seed corn.	
SMALL SIZE CAN	\$1.00
Treats 1 bushel of seed corn.	

Fertilizers, Etc.

Du-Bay Seed Disinfectants

Control Seed-borne Diseases of Farm Crops
Stimulate Germination—Improve Stands
Generally Produce Increased Yields of Higher Quality

Semesan Bel

For seed white and sweet potatoes

Simply mix, dip, drain, dry and your seed potatoes are ready for planting. Effectively controls such seed borne disease organisms as scab, rhizoctonia and black-leg. Germination is generally increased and the resultant crop bigger and of better quality. One pound treats 16 to 20 bushels of seed.

	PRICES
4 ozs.	\$0.50
1 lb.	1.75
5 lbs.	8.00
25 lbs.	31.25

Semesan, Jr.

For Seed Field and Sweet Corn

Its use protects the seed from rotting in the ground and makes possible earlier planting which generally results in increased yields. Improved germination, better stands, control of certain diseases, increased yields are the benefits at a cost of less than 3c an acre.

	PRICES
4 ozs.	\$ 0.50
1 lb.	1.75
5 lbs.	8.00
25 lbs.	31.25

Semesan

For Flower and Vegetable Seeds

Semesan may be applied in dust or liquid form to the seed before planting. It is harmless to the seed but deadly to disease organisms that may be on the seed. One ounce treats 15 pounds of seed. Effective in controlling damping off and such devastating gladiolus diseases as hard rot and scab.

	PRICES
2 ozs.	\$ 0.50
1 lb.	2.75
5 lbs.	13.00
25 lbs.	56.25

VIGORO

Specially prepared plant food

Use it and double your crops

Would you like to double your production in the vegetable and flower garden? Where the soil lacks the natural elements that supply the necessary plant food for high production, you can use Vigoro—a Swift & Co. product—which supplies the exhausted elements and produces delicious vegetables, beautiful flowers, and quicker maturity and more velvety lawns. Vigoro can be spread with the hands as it has no bad odors and is today the last word in a perfect soil builder and crop grower. Vigoro will pay handsome returns for the investment you put into it. Prices, 10 lbs. 75c; 25 lbs. \$1.75; 50 lbs. \$3.00; 100 lbs. \$5.00; f. o. b. Shawnee, Okla.

Inoculate

ALL LEGUMES

Alfalfa, All Clovers, Soy Beans, Cow Peas, Peas, Beans, Vetch, Peanuts with

THE ORIGINAL LEGUME INOCULATOR
Guaranteed Fresh Each Year Leads in High Germ Count

For profitable results, Agricultural Colleges advise inoculation for all legume seed, because it pays well in producing larger quality yields. Fresh, high count NITRAGIN, containing billions of efficient nitrogen-gathering germs, builds up the soil.

All Legume Germs are PERISHABLE. To Protect You, NITRAGIN Cans are Stamped With Expiration Date. Insist on NITRAGIN.

Mixing Nitragin with Seed

Legume germs die rapidly when dried. NITRAGIN, containing

between 30% — 40% moisture, will readily stick to the seed without adding water, and give inoculation. However, for best results, the preferred practice, recommended by The Nitragin Company and Agricultural Authorities is to use water when mixing legume culture with seed.

Seed Samples

We are glad to submit samples of field seed when desired. You know then just what you buy. Of course, we make the same proposition that we have always made. When you order seeds from us and upon receipt of same, if not satisfactory in every way, they may be returned and your money will be refunded and all charges paid. You take no chances when dealing with us.

Earlier, More Profitable Crops

Germaco HOTKAPS can make many extra dollars for you this season. They are patented wax paper cones—"individual hothouses for each plant" that completely cover them, and fully protect them from frost, wind, rain, ground-crusting and insects. This is your assurance of earlier, bigger crops, and higher early-to-market prices. HOTKAPS are inexpensive and easy to use. One man "sets" over 3,000 per day.

Write us about HOTKAPS or order your season's supply now.

Bunching Onion Plants on Clarke & Keller Farm

Frost Proof Cabbage, Tomato and Bermuda Onion Plants

Owning, as we do, one of the finest sections of truck farming land in the heart of the "WINTER GARDEN BELT" of South Texas, we are enabled to grow for our customers the finest plants to be had.

Frost Proof Cabbage

Bermuda Onion plants

Our seed stocks for the production of these plants are imported from the best growers in the world.

We grow the famous Crystal White Wax and White or Yellow Bermuda, Sweet Spanish or Valencia onions by the millions and during the planting season receive them fresh daily. Also grow a splendid assortment of the Frost-proof Cabbage Plants, embracing the Early Jersey Wakefield, Early Flat Dutch and Copenhagen Market—these being time-tested varieties, giving best results.

We offer field grown tomato plants that are hard stemmed. We are growing the New Stone, Chalk's Ea.

Jewel, Marglobe, Dwarf Champion, Spark's Earliana and other standard sorts.

Quote them as follows, parcel post paid:

Cabbage Plants—5,000 lots, \$1.45 per 1,000. Express collect.

The Market Gardener

We had one gardener who exhibited thirty-eight varieties of vegetables at our county fair and scored four hundred and eighty-four points out of a possible four hundred and eighty-five points. The seeds used are the seed we offer you. Submit us your bill for the 1932 season, and let us surprise you with the prices we will make you for quality seed. Many market gardeners buy their seed from our store.

Our catalogue describes all of the best standard varieties, and the new kinds that have become popular. We are prepared to fill all orders, large or small, with our high grade seeds, believing that the best seeds that are produced are required to produce the maximum crop. Such seed is the only seed that you can buy from this store, and we solicit your orders on this basis.

Quality Garden Seeds That Succeed

The spring of nineteen hundred thirty-one was a record breaker in our garden seed business. Thousands of orders came from all sections of the southwest and west. Quality seeds that succeed have made many customers for this store that have bought our seeds for more than twenty years. The greatest care is taken in procuring the best seeds grown and adapted to the southwest. Our years of experience have placed us in a position where we are able to offer only the seed that should be used in this section of the country. We buy only from growers, who have proved by constantly growing good seed, that the seed can be depended upon. In orders for garden seed we give liberal premiums, as well as more seed for the money, than most seedsmen. This policy is what has produced our wonderful garden seed business, and we will serve the new customer as well as the old. Try us for your spring requirements, we will satisfy you.

Eclipse Brand Garden Seed

Asparagus

See page 34 for one and two-year-old roots.

Eclipse Brand Beans

Plant from first of April on through until fall, when moisture conditions are favorable. Sow in rows 2½ to 3 feet apart. One quart will sow 200 feet of row.

Quick Service

Shawnee is situated only a few miles from the exact center of the state. It has two trunk lines: The Rock Island running through the state from east to west, and the Santa Fe from north to south. The O. C. A. & A. also passes through from Oklahoma City to Atoka, Oklahoma. Connecting with other lines that reach all sections of the country, we are in a position to make quick delivery within our trade territory. With the many trains each day in all directions we can get your order to you promptly, either by freight, truck, express or parcel post.

Garden Beets

Sow outdoors in March and April for early crops and later as desired for late maturity. One ounce will sow 50 feet of drill.

Pop Corn

Nearly all standard sorts do well in this country and we list the following types and call especial attention to the MAMMOTH SWEET POP CORN AND DYNAMITE or SOUTH AMERICAN YELLOW.

QUEEN'S GOLDEN — WHITE RICE

WHITE PEARL — JAPANESE HULLESS.

THE MAMMOTH SWEET POPCORN is the new wonder corn. It has large white grains and pops out the most in bulk and size of grains, very sweet and tender. Produces large ears, giving maximum yields under average conditions. Special price of 30c per pound, postpaid, two pounds 50c, postpaid. Ask for special prices on large amounts.

SOUTH AMERICAN GIANT YELLOW POP CORN

This splendid new popcorn has a very large bright yellow grain which pops out an enormous kernel. It has a rich flavor and is very tender. On account of extreme size of the popped kernels, this pop corn will produce more bulk after popping than any other variety. Grows well over the Southwest and produces good yields. Lb. 30c; 2 lbs. 50c, postpaid. Ask for prices on large amounts.

Eclipse Brand Eggplant

Sow in hot-beds and transplant when 2 inches high. Requires warm weather for best growth.

What is there about the home that is more satisfactory than the flower garden? How easy it is to plant and grow them from the time we sow the seed to the time the plant produces the flower. We watch its development with increasing interest, and when we finally see the fruits of our labor we are indeed thankful that so little time and effort has accomplished such wonderful results. Growing flowers from seed has grown by leaps and bounds in the past years, and the demand for the old-fashioned flower as well as the improved and new varieties is constantly increasing. Health and cheerfulness are the result of flower culture. Our flower seed comes from the most reliable growers in this and foreign countries where the varieties mature to the best possible development. We know where to buy the best, and only the highest quality are offered to our customers. Much of your time is spent about the house. Why not add to its comfort by having a beautiful flower garden? Our special collection of 13 varieties found in this catalog for 50c postpaid, will produce a wonderful effect.

Flower Seeds put up in 5c and 10c packets. Special prices in ounce lots.

Day Old Baby Chicks

We have connections with a number of the most reliable Hatcheries in Oklahoma, Missouri and Kansas, hatching eggs from only first class State Accredited Flocks—thus insuring your receiving from us disease free chicks and of pure strains. Our special strains of Barred Plymouth Rocks, Rhode Island Reds, English White Leghorns, Orpingtons, Wyandottes, cannot be excelled. 100% live delivery guaranteed. Let us have your orders and we will assure you of prompt service and satisfaction. All standard varieties can be furnished. Special prices on request.

Barron Strain White Leghorn Chicks

We are the local agents for the famous strain of the Imported Barron White Leghorn Chicks as bred and produced exclusively here by the University Hatchery. These day-old White Leghorn Chicks are hatched from eggs produced from a trap-nested flock having records of 250 and up egg production per year. Priced \$13 per 100 and orders should be placed early as the number of these chicks available will be limited.

Save Baby Chicks at the Start

The feed is pure and sweet and is highly palatable. They go after it with ravenous appetites and grow like weeds. We would have to quit the poultry business if we discontinued the sale of Conkey's Buttermilk Starting Food. It is as sweet and clean as your breakfast food and absolutely essential in the successful raising of the greatest percentage of your chicks.

Conkey's Buttermilk Starting Food comes in 2½, 5, 10, 25 and 100 pound bags. Due to market changes, special prices quoted on request.

Cyclone Hand Seeders

Every farm should have one of these handy seeders. Sows anything from alfalfa seed to oats and all grass seeds where you desire to broadcast the crop. Priced each, \$2.00, postpaid.

BLACK LEAF FORTY—is now recognized as the most effective agent in delousing poultry that has ever been used. Does away with dusting, dipping or greasing your fowls. Simply applied to roosts before fowls go to roost and by morning the work is finished as far as the lice are concerned. Also Black Leaf Forty makes a wonderful spraying solution. Prices and sizes follow—priced F. O. B. Shawnee. 1 oz. bottle, 35c each; 5 oz. bottle, \$1.00; 2 lb. can, \$3.75; 10 lb. can, \$11.85. One lb. glass, \$2.50; 5 lb. tin, \$7.00.

For a Profit at the Start, Buy Clean Seed

All seeds bought from us have been thoroughly cleaned by the most modern machinery, made especially for that purpose. The men operating these machines are experts in that line and when the seeds are sacked and ready for the planter, it is as free from foreign seeds as it is possible to make it. Buying by contract and sample, we use every precaution to purchase no seeds that contain any trace of noxious weed seeds, thereby offering only seeds of the highest purity and germination. By following this policy, and at all times being honest in our dealings with the thousands of customers, we have built our business on a solid foundation and add new customers every year.

A Wide Distribution

SEEDS from Clarke & Keller Seed Store are sold over the entire South. Every year our orders have increased, and extended into new territory. The past year has been our best year, and we have confidently planned to take care of a still larger volume the coming year. Already we are booking many orders from those that have learned that it does not always pay to wait until the planting season arrives to buy their seed, as quite often prices advance at that time. If you will send us a list of your wants early, we will make you the lowest possible prices.

You can rest assured that we will serve you just as well as we would if you were trading over our counter or in our office. Try us once, you will be pleased, and you will receive as high class field, flower, and garden seeds as are produced for the critical trade.

Greetings

Clarke & Keller Seed Store extend best wishes for a Merry Christmas and a Prosperous, Happy New Year. Can we help you enjoy a prosperous year by supplying seeds that are the best at any price? Try us with an order. You will be satisfied.

NOTICE—We can store 125 cars of seeds in our fire-proof warehouses, and during the greater part of the season we have large stocks of all seeds listed; we quote you prices, however, subject to stocks remaining unsold, stenographic errors and omissions and contingencies beyond our control. We have the most intense confidence in our seeds, believing that we sell you just what you ask for. We, and you, know that we have no control over seed after it leaves our hands; we cannot control the natural laws that sometimes affect seeds, nor can we furnish the season for you by which your crops should mature from our seeds. Planted too deep or too shallow, too much rain or too little, baked, crusted soils which will not allow the tender shoots to penetrate, and insects, which often destroy the young plants, are beyond our control.

NON-WARRANTY—The Clarke & Keller Seed Store gives no warranty express or implied as to description, quality, productiveness, or any other matter of seeds (bulbs or plants) it sells and will not be responsible for the crop.

When ordering seeds shipped by parcel post, be sure to enclose money to cover the cost of shipment. The zone and rate of table below will assist you to figure the cost of sending.

A glance at the map will show the zone you are in, measuring from Shawnee. If in doubt, ask your postmaster. The parcel post rates are as follows:

Parcel Post Zone Rates

Zone.	Distance from Shawnee	First lb. or fraction.	Additional lb. or fraction.	Weight limit
1—Within	50 miles.....	7c	1c each	70 lbs.
2—Within	50 to 150 miles	7c	1c each	70 lbs.
3—Within	150 to 300 miles	8c	2c each	70 lbs.
4—Within	300 to 600 miles	9c	4c each	50 lbs.
5—Within	600 to 1,000 miles	10c	6c each	50 lbs.
6—Within	1,000 to 1,400 miles	11c	8c each	50 lbs.

The above rates are the New Rates, effective April 15, 1925. First lb. or fraction column includes the 2c service charge.

When figuring the number of pounds' weight in your order, allow 1 pound extra for packing and sacks, as our seeds are put up net, which means "full weight"—without sacks or wrappers.

Try Grohoma this year—the most profitable fat and protein grain produced.

ECLIPSE BRAND SEEDS

Mail Orders

Thousands of customers order from us by mail. Quick, honest service, Eclipse Seeds, and sixteen ounces to the pound, have built our enormous mail-order business. Try us once, and you will be surprised with the results.
